Website Go-Live: Owner Action Plan

Oct 8, 2026 · @Romana

Do steps 1 and 2 before the site goes live; the rest can follow after launch. Claude Code has finished everything it can do alone. Each remaining item needs something only you or your developer can provide.

1. Make the forms send

Without this, proposal requests and camp registrations go nowhere. It takes about 15 minutes.

1. Sign in to Google as **technoknowledge19@gmail.com** and open **script.google.com**.
2. In Claude Code, ask: *"Show me the Google Apps Script code and setup steps from backend/google-apps-script, step by step."* It will tell you:
   - which code to paste;
   - how to create the Google Sheet the form entries go into;
   - which Script Property to set (the Sheet's ID).
3. In Apps Script, click **Deploy → New deployment**, pick the type **Web app**, and set:
   - **Execute as:** Me
   - **Who has access:** Anyone
4. Click **Deploy**, allow the permissions, and copy the **Web app URL** (it ends in `/exec`).
5. Paste it into Claude Code: *"Here's the Apps Script URL: … Put it in js/api.js, test a form, and commit."*

2. Turn on spam protection

Cloudflare Turnstile is free and gives you two keys: a site key for the website and a secret key that must stay private.

1. Go to **dash.cloudflare.com** and create a free account. Open **Turnstile** and choose **Add widget**, then add `thetechnoknowledge.com` (and `localhost` for testing).
2. Note the two keys Cloudflare gives you: a **site key** and a **secret key**.
3. Give Claude Code **only the site key**.
4. Put the **secret key** in Apps Script under **Project Settings → Script Properties**. Never paste it into the website files.
5. Tell Claude Code: *"Add Turnstile with this site key and verify it in the Apps Script."*

3. Collect the remaining content

These can go live after launch. Send each item to Claude Code as it arrives, and update its status here.

Item	What to get	Status
Principal testimonial	1–2 short quotes from principals you work with, with their written OK to use their name and school	Not started
Case study (SEF)	Approved results, one quote, the year and one photo. Ask SEF what you may publish	Not started
Partner logos	An email from each partner saying you may show their logo. Until then, show only approved ones	Not started
Team photos	A clear headshot of each person and their exact job title	Not started
Camp dates	The next winter and summer camp dates	Not started
Privacy policy	A lawyer's review of the current page. Ask Claude Code: *"Export the privacy policy as a Word file."*	Not started

Before go-live

Two earlier owner items still apply. Do step 1 today; once the forms work, the site can launch and the content above can follow over the coming weeks.

- [ ] Forms send (step 1)
- [ ] Spam protection on (step 2)
- [ ] Export the old site's URLs from **Google Search Console**, so Claude Code can set up redirects and keep your Google rankings
- [ ] Confirm **parental permission** for every photo that shows children
